

# Financial and Strategic Solutions

Maximize your program revenue and manage fiscal activities with sound financial cost principles.

Public Consulting Group (PCG) is proud to offer a range of services to help transform your program operations and optimize your fiscal strategy.

## Financial and Strategic Solutions (FSS)

### Cost Allocation Plan, Indirect Cost Rate, and Time Study Services

PCG has national expertise in developing, implementing, and operating compliant cost allocation plans, indirect cost rates, and Random Moment Time Study (RMTS) programs. Plans and rates are developed by seasoned experts on cost allocation principles and federal regulatory guidance.

### Cost Settlement and Supplemental Payment Strategies

PCG has worked with Medicaid agencies and public providers across the country to optimize Medicaid funding streams through cost settlement and supplemental payment strategies. Our work has covered a broad spectrum of institutional and community-based providers, as well as the introduction of proprietary web-based cost reporting tools to support millions of Medicaid supplemental payments each year.

### Consulting Services

PCG provides a broad array of consulting services to help local and state agencies address operational, budgetary, and regulatory challenges. To identify data-driven findings and recommendations for your organization, our consulting approach applies nationally recognized best practices, industry standards, and knowledge of federal and local regulations. Our team includes subject matter experts with practical knowledge of the industry, operational staff who are skilled at project management, and financial and analytical data professionals experienced in program oversight, compliance, and reporting. Our consulting services include operational efficiency studies, cost of service analysis, feasibility studies, staffing analysis, strategic and master planning, and technical assistance.

## Rate Setting and Support Services

PCG serves as a trusted partner to Medicaid, public health, behavioral health, and other agencies to establish payment rates for both institutional and community-based services. Each rate model includes an interactive impact assessment calculation as well as a report documenting rate recommendations, data sources and assumptions. We have helped states implement rate setting and payment related programs, such as intergovernmental transfers (IGT), upper payment limit calculations, and provider assessments.

## Benefits

PCG has created and implemented innovative public sector fiscal strategies that:

- ✓ Maximize federal revenue
- ✓ Minimize audit risks
- ✓ Allocate expenditures appropriately
- ✓ Establish sound fiscal operational platforms that comply with state and federal laws, regulations, and Office of Management and Budget (OMB) guidance
